

# Dirt Code *Guide*

A simple 1-10 condition score for discussing scope before cleaning begins.

| MAINTAINED |                                                                   | REVIEW FIT |                                                                                       | PHOTOS REQUIRED |                                                                                                   | SPECIALIST |                                                                                                            |
|------------|-------------------------------------------------------------------|------------|---------------------------------------------------------------------------------------|-----------------|---------------------------------------------------------------------------------------------------|------------|------------------------------------------------------------------------------------------------------------|
| 1          | <b>Immaculate</b><br>Pristine throughout. Light maintenance only. | 5          | <b>Average</b><br>Comfortably lived in. Light soap scum. A deep clean may fit better. | 6               | <b>Moderate</b><br>Pets or kids. Moderate bathroom or kitchen buildup.                            | 10         | <b>Specialist</b><br>Biohazard, hoarding, pest waste, or unsafe conditions require a qualified specialist. |
| 2          | <b>Exceptional</b><br>Cleaned almost daily. A quick refresh.      |            |                                                                                       | 7               | <b>Fallen Behind</b><br>Noticeable buildup in bathrooms and kitchen.                              |            |                                                                                                            |
| 3          | <b>Good</b><br>Light surface dust. Looks weekly-cleaned.          |            |                                                                                       | 8               | <b>Challenging</b><br>Heavy dust, soap scum, or kitchen buildup. Detailed scrubbing is needed.    |            |                                                                                                            |
| 4          | <b>Maintained</b><br>Light buildup. Looks biweekly-cleaned.       |            |                                                                                       | 9               | <b>Maximum Challenge</b><br>Intensive detailing throughout. Some floors may need multiple passes. |            |                                                                                                            |
